

# WATER CREATURES BINGO FACT SHEET

**These creatures are very intelligent and have 40% more brain capacity than a human. The males have a very interesting colour. (1)**

**These creatures can be recognized by their long legs, featherless heads, and prominent bills. (2)**

**These creatures warn predators with their brilliant colours and patterns. (3)**

**The mouths on these creatures are located on the bottom side of their bodies. (4)**

**These creatures are known for their razor sharp teeth and strong bite. (5)**

**These creatures look rather heron like until they spread their wings and show off a dazzling yellow, red and black pattern. (6)**

**These creature use their powerful tails and webbed feet to swim. Their ears and nostrils close in the water and they have water-repellent fur to keep them dry and warm. (7)**

**These creatures are the largest freshwater fish in the world! They can grow up to 3 metres (10 feet) and weigh 200 kilograms (440 pounds) (8)**

**These creatures are slow on land but quite fast in the water. They are solitary and nocturnal and live under ground. (9)**

**These creatures can't turn their heads like we do. If they want to look around, they have to turn their entire bodies. (10)**

**These creatures have thick outer shells and walk sideways. They are an important food source for many other creatures. (11)**

**These creatures live in the water and can grow up to 6 feet in length! They have silver and gold skin and no scales. (12)**

**These creatures can grow up to 5 metres long (17feet). They kill their prey by wrapping their body around it and squeezing it to death. (13)**

**These creatures lay between 15-50 eggs in the sand. Hatchlings have very obvious yellow spots on their heads, which shrink as they grow. (14)**

**These creatures have bright pink bills and really do have a whistle as their call. (15)**

**These creatures are carnivores and catch their meals with their strong jaws. At night time their eyes shine red. (16)**

**These creatures will eat almost any fish smaller than them but piranhas are their favourite meal. (17)**

**These creatures have a huge wingspan that can reach up to almost 2 metres (6 feet wide) (18)**

**These creatures can produce an electrical charge that will stun prey and keep predators at bay. (19)**

**These creatures can reach up to 5 metres (16 feet) in length and weigh as much as 453 kilograms (1000 pounds). They are so large that even jaguars and cougars avoid them. (20)**

**These creatures are also known as the Jesus Lizard for their incredible ability to run on the surface of water. (21)**

**These creatures would rather munch on a banana than a human, unlike their cousins, the piranha. (22)**

**These creatures are twice the size of beavers and just as good swimmers. They have an unusual diet - they eat their own feces in the morning. (23)**

**These creatures have translucent skin so that their internal organs are visible. (24)**
